SKILLS

Languages: TypeScript, JavaScript, Python, Java

Frameworks: React, React Native, Expo, GraphQL/Apollo, Next.js, Redux, Tailwind, Node.js

Tools: Git/GitHub, Figma, Storybook, Design Systems, AWS, Firebase, Spline

PROFESSIONAL EXPERIENCE

Software Development Engineer - Dream11 (Nov 2024 - Present)

- Shipped high-scale frontend features for **Dream11's 250M+** user app, owning **product refinements, GQL contracts, UI implementation, integrations, releases** and even **migration from RN to Expo**.
- Built over **8+ end-to-end features** with seamless animations, routing, pagination, pull-to-refresh, store, Real-time AppSync and socket integrations and privacy controls impacting **10M+ daily active users**.
- Shipped and released a new app(**MGMR**) with Expo and TailCall(rust based), handled features like **team creation** and **animated preview**, supporting peak concurrency of **+200k user creates**.
- Built and owned **GQL/Apollo** for Dream11 App, **mono-graphQL, microfrontend**, for a regular scale of **1M+ avg RPM**. Optimized complex sub graphs to simple steps.
- Built **Custom Component Libraries** with **Storybook**, and **tokens pipeline** with direct token consumption from designs, reducing repetitive style changes across apps.
- Built an AI agent workflow that converts PRDs and backend API contracts into GQL queries/mutations, schema mappings, integration and implementation, accelerating dev time.
- Improved code quality and team velocity through code cleanups, contributing internal dev tools and profiling, and Retool-based no-code workflows to ease internal CMS product operations.

SDE-Intern - Logitrix (February-July 2024)

- Engineered front-end of two products from scratch, including **RIMS**, a medical research dashboard. Built multifunctional web apps for clients like India's leading healthcare Apollo & DY Patil Hospitals, leveraging tech like **React.Js, Next.Js, Tailwind and WebSockets, Flask**.

Front-End Dev - Rewire (September 2023-December 2023)

- Engineered and maintained web for the Rewire app, working with **ReactJs, NextJs, Tailwind CSS, AWS-ec2, GoLang**, shipping UI and small REST-APIs on user-data.

PROJECTS

"I always keep shipping projects, please check out my **Github** or **Portfolio** for more."

- **Zeno UI** — Token-first Component System | TypeScript, React, Tailwind
Zeno UI is the package + panel for an AI-powered component and design asset system that helps developers build consistent, themed, and accessible UI with minimal manual effort.
- **Recur Obj Model** — Video Object Analytics Pipeline | Python, YOLOv8, ByteTrack, CLIP
Built a CV pipeline to count unique recurring objects across videos using detection, tracking, and CLIP-based re-identification.
- **Article FM** — Chrome Extension for Article-to-Audio | TypeScript, React, Vite, Tailwind
Built a Manifest V3 extension that extracts article-like content from X/Twitter and plays generated audio in a floating mini-player.

EDUCATION

2020 - 2024	DAYANAND SAGAR INSTITUTIONS B.Tech in Electronics and Communications	CGPA: 7.56
